Architectural Graphics by Francis D.K. Ching

Architects are creative professionals educated, trained, and experienced in the art and science of building design and licensed to practice architecture. Their designs respond to client needs, wants, and vision, protect public safety, provide economic value, are innovative, inspire, and contribute positively to the community and the environment.

Founded in 1857, the American Institute of Architects (AIA) consistently works to create more valuable, healthy, secure, and sustainable buildings, neighborhoods, and communities. Through a dynamic network of more than 250 chapters and more than 95,000 member architects and design professionals, the AIA advocates for public policies that promote economic vitality and public well-being. Members adhere to a code of ethics and conduct to ensure the highest professional standards. The AIA provides members with tools and resources to assist them in their careers and businesses as well as engaging civic and government leaders and the public to find solutions to pressing issues facing our communities, institutions, nation, and world. The organization's local chapter, AIA New Jersey, has served as the voice of the architectural profession in the Garden State since 1900. Based in Trenton, AIA New Jersey has over 2,000 members across six sections. For more information, please visit <http://www.aia-nj.org>
